

Entangled Coherent States and Its Application to Quantum Information Science
— Towards Macroscopic Quantum Communications —

TABLE OF CONTENTS

1. <i>Ideal quantum reading of optical memories,</i> Michele Dall’Arno, Alessandro Bisio, and Giacomo Mauro D’Ariano	1
2. <i>Optomechanical entanglement: How to prepare, verify and “steer” a macroscopic mechanical quantum state?,</i> Stefan Danilishin, Haixing Miao, Helge Müller-Ebhardt, and Yanbei Chen	9
3. <i>Metrology with entangled coherent states - a quantum scaling paradox,</i> Michael J. W. Hall	19
4. <i>The enhanced phase estimation using quantum Fisher information in nonclassical continuous-variable states and its application,</i> Jaewoo Joo, Kimin Park, Hyunseok Jeong, William J. Munro, Kae Nemoto, and Timothy P. Spiller	27
5. <i>Quantum steerability for entangled coherent states,</i> Chang-Woo Lee, Se-Wan Ji, and Hyunchul Nha	35
6. <i>Bell-state measurement and quantum teleportation using linear optics: two-photon pairs, entangled coherent states, and hybrid entanglement,</i> Seung-Woo Lee, and Hyunseok Jeong	41
7. <i>Frozen quantum correlation of continuous variable system in non-Markovian reservoirs,</i> Ying-Qi Lü, Jun-Hong An, Xi-Meng Chen, Hong-Gang Luo, and C. H. Oh	47
8. <i>Communication in non-inertial frames,</i> Nasser Metwally	53
9. <i>Near-optimal coherent-state receivers and multi-copy quantum state discrimination,</i> Ranjith Nair, Saikat Guha, and Si-Hui Tan	59
10. <i>Verification of photonic families of non-Gaussian entangled states,</i> Ryo Namiki	69
11. <i>Attainment of the multiple quantum Chernoff bound for certain ensembles of mixed states,</i> Michael Nussbaum	77
12. <i>Breaking entanglement-breaking by classical correlations,</i> Stefano Pirandola	83
13. <i>Use of entangled coherent states in quantum teleportation,</i> Hari Prakash	93
14. <i>Use of entangled coherent states in quantum teleportation and entanglement diversion,</i> Ranjana Prakash	103
15. <i>Forty-five years of entangled coherent states,</i> Barry C. Sanders	111
16. <i>Entanglement-assisted classical communication using quasi-Bell states,</i> Hiroki Takeuchi, Shota Yamaguchi, and Tsuyoshi Sasaki Usuda	115
17. <i>Non-classicality tests with entangled coherent states,</i> G. Torlai, G. McKeown, P. Marek, R. Filip, G. De Chiara, M. G. A. Paris, F. L. Semiao, H. Jeong, and M. Paternostro	121
